

Chris Anderson

chrisanderson@myself.com - (678) 602-6067 - github.com/chrisanderson27

Skills

- Java
- JavaScript
- Node
- Express
- Angular
- Swift (iOS development)
- Docker
- HTML5/Bootstrap/CSS3
- React
- SQL
- Git/GitHub
- MongoDB
- JSP/Servlets
- jQuery
- AWS
- Spring/SpringBoot
- Hibernate
- RESTful services
- Selenium testing
- SpringMVC

Summary

I am trained in the latest front-end and back-end technologies, and am seeking opportunities to challenge myself and further my career. To view some of my past projects and code, visit my portfolio at chrisanderson27.github.io/chrisanderson

Education

- Full Stack Software Developer Coding Bootcamp** - Atlanta, GA **10/2018 - 12/2018**
Started as an 11 week full time training program, and I'm currently designing full stack projects for clients
- Sichuan Normal University** - Chengdu, China **05/2017 - 07/2018**
2 semesters of Mandarin language courses and teaching english as a foreign language
- Georgia Southern University** - Statesboro, GA **08/2013 - 05/2017**
BS in Computer Science - 3.0 GPA

Work Experience

- Full Stack Web Developer** **12/2018 - Present**
Pyramid Consulting - Atlanta, GA

- I work on a team of developers, and we design full stack web prototypes to present to potential clients
- Key technologies I use daily include Angular, Node, Express, Oracle SQL, Spring, Hibernate, MongoDB, React, Javascript, jQuery, Java and Swift.

- Technical Support Advisor** **08/2018 - 10/2018**
CareerBuilder - Peachtree Corners, GA

- Supported troubleshooting with CareerBuilder's "Applicant Tracking System" software. The support including responding to tickets in Salesforce which were typically software/account related issues.
- Required a deep understanding of backend services, and how to identify where a problem occurred within CareerBuilder's backend workflow. This required SQL, XML, CSS, and HTML knowledge.

- Related Projects** **08/2013 - Present**

- **Full Stack Web Projects**
 - Developed multiple complex, full stack websites including user authentication, animations, and Restful API's. I have experience using both Angular and React-Redux for the front ends.
 - Backend services include creating API's, Spring Boot, SpringMVC, Hibernate, MongoDB, Oracle SQL, Firebase, and Selenium and JUnit Testing
 - Projects I have designed include creating a restaurant ordering and delivery service emulator, a full shopping website, and designing and creating a prototype for a multimedia media startup company. Each of these included animations, user authentication, and backends which were ready for deployment.
- **Mobile Development**
 - **Swift:** Developed almost a dozen iOS applications using Core Data, Realm, or Firebase for data storage. I have experience using animations, SceneKit, SpriteKit, CocoaPods and others.
 - One application was developed working with the ALS Never Surrender Foundation. This app is used to track the progression of ALS Disease in patients and included components using the accelerometer to track the range of motion and acceleration of limbs, displayed the results graphically, and recorded voice data which was sent to a REST service for analysis.
 - **Android:** Multiple Android Studios projects using restful services, SQLite, multi-device connectivity, and user authentication.
 - Projects include: Using multi-device connectivity with graphics and animations to create an interactive gard came, creating views which including fetching data from API's, displaying the data, and allowing the user to create post requests.
